SPOKANE, WASHINGTON

TO OUR CUSTOMERS AND FRIENDS

We are entering upon our forty-first year of service to our customers. We take pride in the fact that for a generation we have been permitted to supply plants, seeds, and nursery products to thousands of our neighbors and friends throughout the Northwest. The many years of active touch with plants have developed a knowledge of horticulture applicable to this region which is free to all—a service we are glad to render. While the production and distribution of soft tender plants are the most difficult of horticultural labors, we have developed equipment and facilities with contact experiences so that we seldom are called upon to replace. Our over 20,000 square feet of greenhouses and 25 acres of highly developed land produce millions of plants, roots, shrubs, trees, seeds, bulbs, etc., and our purchases from over the wide world place us in a position to supply your every need in horticultural requirements. We invite you to place your order with this old, reliable horticultural supply-house with every confidence of the best that labor can produce together with honest products and at the lowest prices consistent with quality and service. We are grateful to our customers for the position we have attained and will continue to merit your patronage.

Yours very sincerely,
KELLY PLANT GARDENS.

POTTED PLANTS—For Frosty and Cold Locations

The positively sure method of success in maturing TOMATOES, EGG PLANT and PEPPERS in the short season localities so common in these northern latitudes is to set KELLY'S INDIVIDUALS. Thousands upon thousands of the KELLY INDIVIDUALS containing these semi-tropical plants are annually doing their duty in maturing their fruit under unfavorable conditions. The whole secret is in the strong, thrifty plant, well hardened, growing in a specially prepared soil and the plant and roots are not in the least disturbed when resetting takes place. With this form and method, plants that are perishable by frost or inclement weather can be held and easily protected while growing all the time, until conditions are favorable.

The additional cost of the KELLY INDIVIDUALS is a mere trifle when compared with the positiveness of the resultant crop.

While we hold ourselves in readiness, on proper proof, to replace free of charge all stock that may prove untrue to label, or refund the amount paid, we give no warranty expressed or implied as to description, quality, productiveness or any other matter of any stock, seeds, bulbs, or plants we sell.

FREE—for Trial. Every customer is welcome to one plant of Kelly's Bonny Best Tomatoes—and one plant of Kelly's Washington Giant Pansy. If wanted please add to your order.

FLATS or shallow boxes, containing about sixty growing plants, is the most positive way of securing a 100% stand and a maximum crop, excepting only our POTTED INDIVIDUALS. If for any reason you do not wish to set them out upon arrival they may be kept for weeks, growing steadily. The plants are spaced evenly so that you may cut a 1x2x3 inch cube of soil with each plant, preventing wilting or setback.

Hundreds of our customers prefer KELLY PLANTS in FLATS for they are sure of a crop of vegetables and flowers.

We can supply FLATS of TOMATO, CABBAGE, KALE, PEPPERS, CELERY, CAULIFLOWER, EGG PLANT, PANSY, CARNATION, KOCHIA, ASTERS, SALVIA, Etc. Note—For your choice in variety refer to classified plants throughout the catalog.

FLATS, each \$1.25; not prepaid. Sent safely by express or parcel post. Shipping weight about 30 lbs.

KELLY'S EVERBEARING STRAWBERRIES

Think of picking ripe fruit ninety days from the setting of the plant and continually fruiting until the freezing of the fruit and plant prevents further growth, in the early winter.

From June till December

MASTODON

A recent introduction that has created nation-wide interest as an extra large Everbearing Strawberry. The introducer claims it to be the equal of Superb in foliage, averages larger in fruit, almost as sweet as Progressive and much better plant maker.

Since the Inland Empire climate and soil are ideal for the production of Everbearing Strawberries, in fact is the highest producing section in the U. S., the Mastodon will surely be a money maker.

Order at once as stock is very limited.

Remember our **MASTODON** plants are direct from the originator. "BE SURE YOU START RIGHT."

Postpaid, doz., 50c; 25, \$1.00; 50, \$1.50; 100, \$3.00. Not prepaid, 200, \$4.50; 500, \$10.00; 1000, \$20.00.

FERTILIZERS—NOT PREPAID

Feeding plants is as essential as that of feeding animals. While most soils are provided with an abundance of the elements to produce crops, wise nature has so combined and locked up the natural fertilizer agents in the soil so that greedy man would not be able to rob them too hastily. The liberation of this plant food becomes a basic study for the producer. This involves keen judgment and much experimentation. This subject is merely presented to interest you sufficiently to cause some experimenting with the use of organic and inorganic fertilizers. You will find it very interesting and highly profitable. We may be able to assist you. Our service is FREE.

MANURE—Animal. As everyone knows, animal manures are the best food for a hungry, poor soil. Not only the fertility that it contains but the organic matter is equally essential to plant growth. We decompose hundreds of tons annually and offer this "best of all" fertilizer well rotted. Price not prepaid. 25 lbs., 75c; 100 lbs., \$2.00; one ton, \$20.00.

NITRATE OF SODA—Use as a top-dressing at the rate of 100 lbs. per acre. For the home garden apply as a solution one ounce to two gallons of water. This salt is the most quick acting stimulant to plant growth known. Not prepaid, 1 lb., 10c; 10 lbs., 85c; 50 lbs., \$3.50.

TANKAGE—A rich food for all plants. 100 lbs., \$2.50; ½ ton, \$22.50.

BLOOD MEAL—A finely ground dry quick acting food for plant life. Easily applied. 5 lbs., 50c; 100 lbs., \$5.00.

BONE FLOUR—Rich in phosphorus. The use of which is a secret in securing beautiful lustre to flower blooms. 1 lb., 10c; 10 lbs., 60c; 100 lbs., \$4.00.

SHEEP MANURE—Dry and fine. Very soluble and quick acting. Use liberally on vegetables and flowers. It will pay handsomely. 10 lbs., 50c; 50 lbs., \$1.00; 100 lbs., \$1.50.

POTASH—Muriate—An element often lacking in the heavier moist soils. Builds robust plants and enhances color to fruit. 10 lbs., 75c; 100 lbs., \$4.50.

SULPHUR—Black—While sulphur has been known as a fungicide and as a cleansing agent to plant life its value as an agent to increase the soil's food supply is somewhat new, yet positive. Astonishing results have been reported. 10 lbs., 75c; 100 lbs., \$5.00.

Write for prices on quantities.

INSECTICIDES

DERISOL—An easier and more effective remedy for the control of leaf and plant sucking insects such as aphids, red spider and other pests.

1 oz. makes 6 gals. spray, 40c. ½ lb. makes 50 gals. spray, \$1.50. 1 lb. makes 100 gals. spray, \$2.50.

ARSENATE OF LEAD—For leaf and plant eating insects. 1 lb. makes 25 gals. spray, 45c. 4 lbs. makes 200 gals. spray, \$1.00.

BORDEAUX—9 lbs. to 50 gals of water. The most effective known remedy for plant protection from the fungous diseases. 1 lb., 40c; 4 lbs., \$1.00.

Hotkaps

Weight, 2½ lbs. per 100.

New Method of Plant Protection

A money-maker—matures crops earlier; shields plants from frost, wind and rain; protects them from insects; miniature "hot-houses." An amazing invention—crop INSURANCE.

Our Tomato Plants are not just ordinary plants. We begin by carefully producing our own seed in our own fields. Careful selection of fruit for seed purposes only has resulted to a very marked degree, earliness, shipping qualities and increased production. Our methods of propagation, due to 35 years of persistent application and with our modern equipment and facilities, has rendered a service for greater quality production, unequaled by any propagators anywhere.

Among all the flowering shrubs that make for beauty, grace and ornamentation, there is none that can compare with the rose. The wide range of color, shape and size of the blooms and the diversity and character of the foliage give it a wider range for decoration than any other single group of plants.

Owing to the difficulties that most people have in establishing Roses with bare roots, we have decided to supply only **POTTED AND STARTED ROSES**. This method not only **INSURES** your Rose to grow, but induces earliest blooming and lengthens the season.
